

SCIENCE N WHEELS

ABOUT SCIENCE ON WHEELS

We bring the science to you! Science on Wheels engages people of all ages in Science, Technology, Engineering and Math (STEM) experiences at your site. From large-scale Assemblies and Family Nights to smaller-scale Classroom Workshops, our engaging programs are sure to spark a passion for science.

Our in-depth, hands-on programs are well-equipped for a variety of settings and consist of grade-specific content that supports Arizona Academic Standards and Next Generation Science Standards.

**LEARN MORE AND REQUEST YOUR SCIENCE ON WHEELS EXPERIENCE AT
[AZSCIENCE.ORG/SOW](https://azscience.org/sow)**

WORKSHOPS

GRADES PREK-8

WORKSHOPS | GRADES PREK-8

We bring the science to your classroom! Preschool and K-8 Science on Wheels Workshops consist of hands-on, grade-specific content based on Arizona State Education Standards. They are designed for a single class or similarly-sized group.

*Pricing varies and is listed under each grade level. *Discounts available for multiple sessions of the same Workshop on the same day.*

WORKSHOPS | PRESCHOOL

UP TO 25 PARTICIPANTS | 60 MINUTES | \$250 PER SESSION

1. **3-2-1 Liftoff—Stomp Rockets**

Get ready for liftoff! Design, build and test your own rockets using a specially-engineered stomp rocket launch pad.

2. **All About Arizona**

Learn about some of the things that call the desert home. Observe real desert plants, rocks, fossils and artifacts, then create a desert animal and protect it from the sun.

3. **All About Clouds**

Your head will be in the clouds as you learn how to identify different cloud formations, make your own models to take home and observe a cloud appear and disappear right before your eyes!

4. **Bounce and Roll**

Explore the scientific relationship between gravity, force and motion through various hands-on physics experiments. Engineer ramps, knock down bowling pins and make a bouncy ball to take home!

5. **Bubbleology**

Pop! Mix up your own bubble solution, create and test unique bubble wands, and observe a giant bubble from the inside!

6. Build It

What can you build? Learn about engineering, math and architecture as you complete multiple building challenges—including recreating famous structures from around the world!

7. Coding with Kibo

Meet Kibo, a robot that introduces young scientists to coding using blocks! Build and program your robot to complete a series of movements and sounds.

8. Colorful Chemistry

Join our journey of rainbow science as we mix up colorful art, color-changing chemistry experiments and make a lava lamp to take home.

9. Dino-mite!

Explore paleontology as we transform into dinosaur detectives. Piece together a paleontologist kit, excavate at a dig site, and research your findings!

10. Icy Investigations

Winter is here! Plan an investigation to test how different substances react with ice and mix your own snow dough to take home!

11. Insectarium

Play a game to 'find your kind', compare and contrast different species' life cycles, and explore the characteristics that make an insect!

12. It's Slime Time!

Get messy as you investigate preschool chemistry! Practice measuring ingredients and the properties of silly, slippery slimes and invent a scientific goo to take home.

13. Junior Detectives

Who stole the cookies from the cookie jar? Learn how to analyze fingerprints and use detective tools, then use those skills to solve the cookie jar mystery!

14. Light and Shadows

Discover the characteristics of light and shadows by hunting for shadows, exploring light mixing and creating shadows with a variety of objects.

15. Scribble Bots

Use the engineering design process to brainstorm, build and decorate a Scribble Bot. What unique designs can your robot scribble?

16. Solar Science

Explore the star that provides heat, light and energy. Safely observe the sun with solar viewers and create projects that harness the power of the sun!

** Please note: this requires access to an outdoor space.*

17. Space Explorers

Explore your favorite planets and stars in space! Learn how to use a real telescope, build a constellation viewer and see the Moon up-close.

18. Whirly, Twirly, Flying Things

Design soaring helicopters and test them out in our specially-engineered wind tunnel.

WORKSHOPS | GRADES K-1
UP TO 30 PARTICIPANTS | 60 MINUTES | \$300 PER SESSION *

1. 3-2-1 Liftoff—Stomp Rockets

Get ready for liftoff! Design, build and test your own rockets using a specially-engineered stomp rocket launch pad.

2. Bounce and Roll

Explore the scientific relationship between gravity, force and motion through various hands-on physics experiments. Engineer ramps, knock down bowling pins and make a bouncy ball to take home!

3. Bubbleology

Pop! Mix up your own bubble solution, create and test unique bubble wands, and observe a giant bubble from the inside!

4. Build It

What can you build? Learn about engineering, math, and architecture as you complete multiple building challenges including recreating famous structures from around the world.

5. Coding with Kibo

Meet Kibo, a robot that introduces young scientists to coding using blocks! Build and program your robot to complete a series of movements and sounds.

6. **Colorful Chemistry**

Join our journey of rainbow science as we mix up colorful art, color-changing chemistry experiments and make a lava lamp to take home.

7. **Insectarium**

Play a game to 'find your kind', compare and contrast different species' life cycles, and explore the characteristics that make an insect!

8. **Junior Detectives**

Who stole the cookies from the cookie jar? Learn how to analyze fingerprints and use detective tools, then use those skills to solve the cookie jar mystery!

9. **Light and Shadows**

Discover the characteristics of light and shadows by hunting for shadows, exploring light mixing and creating shadows with a variety of objects.

10. **Scribble Bots**

Use the engineering design process to brainstorm, build and decorate a Scribble Bot. What unique designs can your robot scribble?

11. **Solar Science**

Explore the star that provides light, heat and energy. Safely observe the Sun with solar telescopes and create art projects that harness its power!

12. **Space Explorers**

Explore your favorite planets and stars in space! Learn how to use a real telescope, build a constellation viewer and see the Moon up-close.

13. **Stomach This**

Explore the longest system in the human body: the digestive system! This hands-on program illustrates how food travels through our bodies and gives us the nutrients we need to survive.

14. **Whirly, Twirly, Flying Things**

Design soaring helicopters and test them out in our specially-engineered wind tunnel.

WORKSHOPS | GRADES 2-3
UP TO 30 PARTICIPANTS | 60 MINUTES | \$300 PER SESSION*

1. 3-2-1 Liftoff—Stomp Rockets

Get ready for liftoff! Design, build and test your own rockets using a specially-engineered stomp rocket launch pad.

2. 3-2-1 Liftoff—Soda Bottle Rockets

Ready for launch! Design, build and test your own rockets using a specially-engineered stomp rocket launch pad.

3. Awesome Anatomy

Work in small groups to learn proper dissection techniques and etiquette to explore the anatomy of real specimens! Please inquire about current availability for:

- Owl Pellet Dissection | Additional \$75 Per Session

4. Chemysteries

Investigate the properties of various solid, liquid and gas chemicals, and explore the mysterious changes that occur when they are combined. You won't believe this color-changing chemistry isn't magic!

5. Dash into Coding

Learn how to code in a fun and interactive way! Guide Dash, the robot, through various challenges by coding them with a tablet.

7. Incredible Inventions

Learn about simple machines, forces and the engineering design process as your team works together to build a ramp that will slow down a bouncy ball as it rolls to the end.

8. Insectarium

Compare and contrast different species life cycles and learn about adaptations that help small critters thrive. Compete to see who has the best camouflage skills, and make a terrarium to keep in your class!

**Please note: one terrarium per class.*

9. Monster Manual

Learn how DNA serves as an instruction manual for our bodies while extracting real DNA from a strawberry and decoding the DNA of a “monster”.

10. Ocean Rescue

Learn about real-world chemistry as you investigate the relationship between pH and coral reefs. Plus, learn how to help our water systems by building a water filter to clean polluted water!

11. Roller Coasters

Explore the concepts of gravity, motion and energy while completing roller coaster design challenges.

12. Solar Science

Explore the star that provides light, heat and energy. Safely observe the sun with solar viewers and create projects that harness the power of the sun!

**Please note: this requires access to an outdoor space.*

13. Sphero Mazes

Learn all about coding with Sphero robots! Create a unique maze and challenge your classmates to direct their robots through it.

**Please note: this program requires ample floor space.*

14. Stomach This

Explore the longest system in the human body: the digestive system! This hands-on program illustrates how food travels through our bodies and gives us the nutrients we need to survive.

15. The Power of a Drop

Meet an ancient specimen and learn how many places a single drop of water can visit. Follow along to learn about the water cycle and construct a graph from your findings!

Generously Supported by Central Arizona Water Project.

WORKSHOPS | GRADES 4-5
UP TO 30 PARTICIPANTS | 60 MINUTES | \$300 PER SESSION *

1. 3-2-1 Liftoff—Stomp Rockets

Get ready for liftoff! Design, build and test your own rockets using a specially-engineered stomp rocket launch pad.

2. 3-2-1 Liftoff—Soda Bottle Rockets

Ready for launch! Design, build and test your own rockets using a specially-engineered stomp rocket launch pad.

3. Awesome Anatomy

Work in small groups to learn proper dissection techniques and etiquette to explore the anatomy of real specimens! Please inquire about current availability for:

- Squid Dissection | Additional \$75 per Session
- Cow Eye Dissection | Additional \$75 per Session
- Fish Taxonomy (3 Types of Fish) | Additional \$175 per Session
- Owl Pellet Dissection | Additional \$75 per Session

4. Charged Up

Discover basic principles of electricity through the use of a Van de Graaff generator and hands-on challenges using insulators, conductors, and circuits.

5. Chemysteries

Investigate the properties of various solid, liquid and gas chemicals, and explore the mysterious changes that occur when they are combined. You won't believe this color-changing chemistry isn't magic!

6. Engineer a Rescue

Use principles of physics and engineering to design and build a zipline to get your animal across different terrains. Can your team successfully engineer a safe rescue?

7. Geology Rocks!

Observe real rocks and minerals and test their hardness on the Mohs hardness scale. Plus, learn about Arizona's unique relationship with rocks by forming a mining company that digs for copper and other minerals.

8. Incredible Inventions

Learn about simple machines, forces and the engineering design process as your team works together to build a ramp that will slow down a bouncy ball as it rolls to the end.

9. Level Up with Bloxels

Work in groups to build a video game character and the world they live in using Bloxels (pixel blocks). Then, bring your creations to life and test out your unique-to-you video game!

10. Ocean Rescue

Learn about real-world chemistry as you investigate the relationship between pH and coral reefs. Plus, learn how to help our water systems by building a water filter to clean polluted water!

11. Roller Coasters

Explore the concepts of gravity, motion and energy while completing roller coaster design challenges.

12. Sphero Mazes

Learn all about coding with Sphero robots! Create a unique maze and challenge your classmates to direct their robots through it.

**Note: This program requires ample floor space.*

13. The Power of a Drop

Water is a commodity that can't be wasted! Use planning, prototyping and teamwork to help Arizona's urban and rural communities utilize their water sources.

Generously Supported by Central Arizona Water Project.

14. Tints and Prints

Explore the history, science and art behind the natural dyes! Using local plants we will extract these wonderful colors to create a beautiful bookmark you get to keep.

15. Zombie MD

A zombie virus has infected your class! Learn about epidemiology by working as a class to track the spread of the virus. Then, work in small groups to create a vaccine.

WORKSHOPS | GRADES 6-8

UP TO 30 PARTICIPANTS | 60 MINUTES | \$300 PER SESSION*

1. 3-2-1 Liftoff—Stomp Rockets

Get ready for liftoff! Design, build and test your own rockets using a specially-engineered stomp rocket launch pad.

2. 3-2-1 Liftoff—Soda Bottle Rockets

Ready for launch! Design, build and test your own rockets using a specially-engineered stomp rocket launch pad.

3. Awesome Anatomy

Work in small groups to learn proper dissection techniques and etiquette to explore the anatomy of real specimens! Please inquire about current availability for:

- Squid Dissection | Additional \$75 per Session
- Cow Eye Dissection | Additional \$75 per Session
- Fish Taxonomy (3 Types of Fish) | Additional \$175 per Session

4. Battlebots

Explore coding and engineering design principles by arming a Sphero robot. Teams will work collaboratively to prepare their robot for battle!

**Note: This program requires ample floor space.*

5. Engineer a Rescue

Use principles of physics and engineering to design and build a zipline to get your animal across different terrains. Can your team successfully engineer a safe rescue?

6. Level Up with Bloxels

Work in groups to build a video game character and the world they live in using Bloxels (pixel blocks). Then, bring your creations to life and test out your unique-to-you video game!

7. Roller Coasters

Explore the concepts of gravity, motion and energy while completing various roller coaster design challenges—including loops and corkscrews!

8. The Power of a Drop

Water is a commodity that can't be wasted! Use planning, prototyping and teamwork to help Arizona's urban and rural communities utilize their water sources.

Generously Supported by Central Arizona Water Project.

9. Zombie MD

A zombie virus has infected your class! Learn about epidemiology by working as a class to track the spread of the virus. Then, work in small groups to create a vaccine.

WORKSHOPS | GRADES 7-12
UP TO 30 PARTICIPANTS | 90 MINUTES | \$600 PER SESSION*

1. Circuit Science

Explore the basics of electric circuits by creating a simple light-up circuit. Expand your abilities by creating a wearable piece of “flashy” art!

2. Design It with Makey Makey

Use the human-centered design process to brainstorm, prototype and test a one-handed controller designed for computer game play.

**Note: This program requires a class set of computers.*

3. Electric Car

Learn about how a car moves! Teams assemble and engineer electric cars using pulleys, gears and motors.

4. Intro to Soldering

Investigate the process of joining materials by melting metal! Use basic soldering techniques and tools to create unique projects.

ASSEMBLIES

UP TO 100 PARTICIPANTS | 45 MINUTES | \$400 PER SESSION*

Prepare to be amazed by chemistry, liquid nitrogen and fiery experiments!

**Discounts available for multiple sessions of the same assembly on the same day.*

FOR GRADES K-5

Superhero Science

Who's your favorite superhero? Explore the science behind fan-favorite super powers such as flying, freeze rays and lightning discharges!

FOR GRADES K-8

Combustion!

What are the three elements a fire needs to ignite? What happens when we change one of these elements? Learn about fire safety and explore combustion in this red-hot assembly!

Really Cool Science

Take a break from the Arizona heat to learn about solids, liquids and gases while observing some of the coolest liquid nitrogen experiments!

FOR GRADES 4-8

Mix it Up!

What are the different signs of a chemical reaction? Observe colorful, bubbly experiments to investigate the world of chemistry. You won't believe it's not magic!

FAMILY SCIENCE NIGHT

\$600 FOR LESS THAN 500 PARTICIPANTS

\$675 FOR OVER 500 PARTICIPANTS

2 HOUR MINIMUM | \$100 EACH ADDITIONAL HOUR*

Invite your friends and family! Family Science Nights are ideal for large audiences of all ages. These engaging programs consist of hands-on activities that curious minds can explore at their own pace. While available during school hours, Family Science Nights are designed for evening events or as an addition to your school's Science Night.

FOR GRADES K-2

Storybook STEM Family Night

Combine STEM and literacy through engaging, hands-on challenges. Each activity is inspired by a popular children's book.

FOR GRADES K-8

All About Arizona Family Night

Explore the amazing state we call home through hands-on activities. Observe desert animal characteristics, mine for copper, decorate a cactus, and more!

Astronomy Family Night

Explore space with hands-on activities about planets, stars, gravity, and being an astronaut. And view space through telescopes!

**Note: The site must provide an adult volunteer to supervise the telescopes outside.*

Brain Games Family Night

Put your brain to use! Explore hands-on puzzles, riddles, and challenges that exercise different parts of your brain.

Engineering Family Night

Channel creativity, problem solving, teamwork, and communication through hands-on challenges and explore the role of engineering in everyday life.

Explore STEM Family Night

Engineer a tower, explore the planets, test your balance and more! This family night blends fun from all branches of science.

Innovaciones Brillantes Family Night

Celebrate Hispanic innovation! Experience interactive activities that highlight Hispanic pioneers in STEM fields like Engineering, Technology, Life Sciences, Family Night and more—developed to inspire future innovators.

UNIVERSE ON WHEELS MOBILE PLANETARIUM GRADES PREK-12

See the stars with Universe on Wheels! The Mobile Planetarium Dome is a state-of-the-art, inflatable, ADA-accessible portable planetarium that can seat 30-50 participants at a time, depending on ages. Shows vary in topic, length and grade level, and multiple groups can rotate throughout the day.

LARGE DOME

19' tall, 30' long, 22' wide

40-50 Participants per Show

2 Hours Minimum (~3 Shows per Hour)

\$1,000 For the First 2 Hours, \$150 Each Additional Hour

SMALL DOME

10' tall, 17' long, 17' wide

30 Participants per Show

2 Hours Minimum (~3 Shows per Hour)

\$800 For the First 2 Hours, \$120 Each Additional Hour

Note: The mobile dome requires a large indoor space, such as a gymnasium or cafeteria.

STEM EXTRAVAGANZA

GRADES K-8

UP TO 900 PARTICIPANTS | FULL OR HALF DAY

PRICING VARIES

Invite Arizona Science Center for a science-filled school takeover! This highly customizable experience includes a full or half-day of fun filled with engaging, hands-on experiences. Students rotate through hands-on workshops, exciting science assemblies, Universe on Wheels planetarium presentations and more! Available as an add-on, teachers can engage in STEM professional development opportunities and activities.

PRICING BASED ON FULL-DAY EXPERIENCE

- Less than 100 students: \$2,500
- 101-200 students: \$4,200
- 201-400 students: \$7,000

Note: Must split students in two groups: one session in the morning, one session in the afternoon

- 401-600 students: \$9,200

Note: Must split students in two groups: one session in the morning, one session in the afternoon

- 601-900 students: \$11,000

Note: Must split students in two groups: one session in the morning, one session in the afternoon

TABLING PRICING VARIES | UP TO 3 HOURS

Tablings are excellent ways for our communities to interact with the science center and allow us the ability to showcase what the organization is about in a short amount of time.

ACTIVITIES

Snap Circuits

Can you complete the challenge? Learn to read a guide and create a series of circuit challenges for success. Make a fan twirl, a speaker sing, and light up the booth if you succeed!

Note: Access to an outlet required

Dash

Ready, Set, Go! Participants will be able to control a DASH robot to guide them through our obstacle course. Have a specific theme for your event? Let us know- DASH likes to dress for the occasion!

Ozobots

Calling all coders and artists! Create a collaborative story board for our Ozobots to explore, or make your own smaller design to take home! The site has the option to keep the collaborative piece after the event is over.

Pollinators

Learn more about our home and the essential pollinators that keep our desert blooms thriving! Participants are invited to create a whirly twirly bat to take home with them.

These are Not Blocks

Stack, fit, group, and build. Put your engineering and construction skills to the test. These blocks could be anything! What will you create?

SEASONAL ACTIVITIES

AVAILABLE OCTOBER – END OF NOVEMBER

Howl, Creak, Squeak: The Science of Foley Artists!

Do you have what it takes to be a Foley artist? Explore and investigate a variety of props to recreate popular sounds from Halloween films, matching scenes to your sound effects!

Note: This activity works best in its own space or classroom. Access to an outlet required

Ghost Bubbles

Bubble bubble, toil and trouble! Add a ghostly presence to your event with our ghost bubbles table. Participants will be invited to create bubbles that burst and dissipate into the night. Is it magic? Or is it science??

Note: Access to an outlet required

DASH Fortune Teller

Trick or Treat! Have our DASH robot predict what prize is in your future! This offering works well to add Arizona Science Center to your trunk or treat style events.

WORKSHOPS | PRESCHOOL

- \$250 for the first and each additional session

WORKSHOPS | GRADES K-8

- \$300 for the first session
- \$250 for each additional session *

WORKSHOPS | GRADES 7-12

- \$600 for the first session
- \$300 for each additional session *

ASSEMBLIES

- \$400 for the first session
- \$300 for each additional session *

FAMILY SCIENCE NIGHTS

- \$600 for up to 500 participants for the first 2 Hours
- \$675 for over 500* participants for the first 2 Hours

UNIVERSE ON WHEELS

- Large Dome | \$1,000 for First 2 Hours
- Small Dome | \$800 for First 2 Hours

STEM EXTRAVAGANZA

Note: Pricing varies based on the number of students and length of day. Add-ons such as Universe on Wheels and educator professional development may affect the prices below.

- Less than 100 students: \$2,500
- 101-200 students: \$4,200
- 201-400 students: \$7,000

Note: Must split students in two groups: one session in the morning, one session in the afternoon

- 401-600 students: \$9,200

Note: Must split students in two groups: one session in the morning, one session in the afternoon

- 601-900 students: \$11,000

Note: Must split students in two groups: one session in the morning, one session in the afternoon

TABLING

- \$200 for 3 Hours and 1 Team Member
- \$100 for 3 Hours and 1 Team Member | Title 1 or Non-Profit Businesses

TRAVEL FEES

- 50-100 miles from Arizona Science Center: \$125
- 101-150 miles from Arizona Science Center: \$160
- 151-200 miles from Arizona Science Center: \$200
- 201-250 miles from Arizona Science Center: \$260
- 251+ miles from Arizona Science Center: \$300
- Requires Overnight Stay: \$300

**Discounted sessions/hours must be the same Workshop, Assembly, Family Science Night or STEM Extravaganza topic on the same day.*
